receiving a request for medical services from the patient; ~~and~~

establishing a real-time electronic communications link between the patient and one of the one or more medical professionals by the virtual clinic; and

obtaining particular diagnostic test results by the patient at the particular diagnostic center.

6. (Previously Presented) The method of claim 5, further comprising:

accessing a web page by the patient that is provided by the insurance carrier;

receiving, by the insurance carrier, information from the patient through the web page;

forwarding the information to the virtual clinic;

based upon the information, selecting a medical professional.

7. (Canceled)

8. (Canceled)

9. (Currently amended) A system comprising:

a network;

~~at least one~~ a medical professional device for use by a medical professional and enabled to receive information from the network and to submit responses on the network;

~~at least one~~ a patient device for use by a patient and enabled to submit information on the network and to receive responses from the network;

a diagnostic center ~~being local to the patient and~~ having diagnostic testing equipment and being other than a treatment-providing facility or the patient's private home; and

a virtual clinic being configured to receive information and responses from the network, to select the medical ~~a medical~~ professional based upon the information provided by the patient, and to enable real-time electronic communication of the information and the responses between the medical professional device and the patient device, the virtual clinic associated with the diagnostic center.

10. (Canceled)

11. (Canceled)

12. (Canceled)

13. (Previously Presented) The system as in claim 9, the system further comprising:  
a hospital enabled to receive the information from the network and to submit responses.

14. (Canceled)

15. (Canceled)

16. (Currently amended) A system comprising:

a network;

~~at least one~~ a medical professional device for use by a medical professional and enabled to receive information from the network and to submit responses on the network;

a patient device for use by a patient and enabled to make a request for medical services, to submit the information on the network and to receive the responses from the network;

a diagnostic center ~~being local to the patient and~~ having diagnostic testing equipment and being other than a treatment-providing facility or the patient's private home;

an insurance carrier being configured to receive the request for medical services from the patient and to forward the request to a virtual clinic, the virtual clinic being configured to receive the information and the responses from the network, the virtual clinic being configured to select

~~one of the at least one~~ medical professional based upon the information provided by the patient, the virtual clinic being configured to enable real-time electronic communication of the information and the responses between the medical professional device and the patient device, the virtual clinic being associated with the diagnostic center.

17. (Canceled)

18. (Canceled)

19. (Canceled)

20. (Previously Presented) The system as in claim 16, the system further comprising:  
a hospital enabled to receive the information from the network and to submit responses.

21. (Canceled)

22. (Canceled)

23. (Canceled)

24. (Canceled)

25. (Currently amended) A method ~~for developing a virtual clinic for allowing a patient to remotely contact a medical professional and receive medical services~~, comprising:

establishing a virtual clinic having capabilities for:

(a) enabling ~~a~~ the patient to contact the virtual clinic,

(b) collecting information on the patient's medical condition,

(c) identifying at least one medical professional based on the collected information, and

(d) accessing the patient's medical records;

establishing a working relationship with the least one medical professional to provide

medical services to patients referred via the virtual clinic, the medical professional providing information relating to qualifications for use during a selection process;

providing diagnostic testing equipment at a diagnostic center local to the patient and associated with the virtual clinic, the diagnostic center being other than a treatment-providing facility or the patient's private home; and

enabling by the virtual clinic ~~electronic~~ real-time electronic communication between a patient device operated by the patient and a medical professional device operated by the medical professional to transmit the information regarding the patient's condition, results from the diagnostic equipment, and recommended treatment.

26. (Canceled)

27. (Previously Presented) The method of claim 25 further comprising:  
submitting information relating to medical licenses by the medical professional; and  
comparing a patient's residence with the medical professional's medical license by the virtual clinic.

28. (Previously Presented) The method of claim 25 further comprising:  
providing the patient with access to the diagnostic testing equipment.

29. (Previously Presented) The method of claim 25, wherein the step of providing diagnostic testing equipment comprises providing for communication of diagnostic testing equipment results with the at least one medical professional.

30. (Original) The method of claim 25, wherein the virtual clinic has a presence on at least one Internet site.

31. (Previously Presented) The method of claim 25, wherein the virtual clinic further has the capability for at least one insurance company to refer patients to the virtual clinic.

32. (Previously Presented) The method of claim 25, wherein the virtual clinic has the capability for at least one hospital to refer patients to the virtual clinic.
33. (Previously Presented) The method of claim 25, wherein the virtual clinic has the capability for informing a medical professional of diagnostic testing equipment results.
34. (Previously Presented) The method of claim 25, wherein the virtual clinic has the capability for allowing a medical professional to access and update a patient's medical records.
35. (Canceled)
36. (Canceled)
37. (Canceled)
38. (Previously Presented) The method of claim 25, further comprising:  
contracting with at least one hospital to provide access to diagnostic testing equipment to patients of the virtual clinic.
39. (Canceled)
40. (Currently amended) A method ~~for a patient to remotely contact a medical professional and to receive medical services~~, comprising:  
the a patient contacting a virtual clinic;  
the patient providing information on his medical condition to the virtual clinic;  
the virtual clinic identifying a medical professional based on the patient-provided medical condition information;  
the virtual clinic enabling real-time electronic communication between a patient device operated by the patient and a medical professional device operated by the identified medical professional;

the patient corresponding electronically with the medical professional;  
the virtual clinic enabling the patient to access a diagnostic center being ~~local to the patient and~~ associated with the virtual clinic and being other than a treatment-providing facility or the patient's private home, the diagnostic center having diagnostic testing equipment; and  
the medical professional informing the patient of recommended treatment.

41. (Original) The method of claim 40, further comprising:  
at least one insurance company referring at least one patient to the virtual clinic.
42. (Original) The method of claim 40, further comprising:  
at least one hospital referring at least one patient to the virtual clinic.
43. (Original) The method of claim 40, further comprising:  
the virtual clinic receiving payment for medical services provided.
44. (Previously Presented) The method of claim 43, further comprising:  
the virtual clinic forwarding a portion of the received payment to the medical professional.
45. (Previously Presented) The method of claim 40, further comprising:  
informing the medical professional of the diagnostic testing equipment available to the patient.
46. (Previously Presented) The method of claim 40, further comprising:  
at least one medical professional providing information relating to medical licenses and  
the virtual clinic comparing a patient's residence with a medical professional's medical license.
47. (Previously Presented) The method of claim 40, wherein the step of identifying a medical professional based on the patient-provided medical condition information comprises medical professionals providing information relating to qualifications and the virtual clinic

comparing the patient-provided medical condition information with the medical-professional-provided information relating to qualifications.

48. (Original) The method of claim 40, further comprising:  
the patient contracting with the virtual clinic to provide payment in return for receiving medical services.

49. (Original) The method of claim 40, further comprising:  
at least one insurance company reimbursing the virtual clinic for medical services provided to at least one patient.

50. (Previously Presented) The method of claim 40, further comprising:  
at least one physician reimbursing the virtual clinic for directing the patient to the medical professional.
